

PAL

HANDHELD INSPECTION

PRODUCT DESCRIPTION:

PAL is the perfect lighting solution for assembly, inspection or general repair work in confined areas. It is ideal for applications that include automotive, industrial, aviation and HVAC inspection and repair. Also ideal for plug-in, portable illumination when viewing electrical control panels, production systems and manufacturing equipment. Durable acrylic shield and rubber guard cap protects lamps against dust and breakage. A removable, hi-gloss reflector built into the shield projects the light

beam in one direction to provide greater efficiency and light intensity. The new internal lamp guide allows easy lamp replacement and maintenance. The integral mounting hook allows the PAL to be hung almost anywhere. The 13-watt CFL lamp delivers high efficiency, excellent color rendition and 10,000 hours of lamp life. PAL includes a cord-set for standard 120V plug-in operation. A UV (13-watt) lamp is available as a special accessory.

NOTE: The PAL is not suitable for wet locations or applications where unit will be subjected to liquids.

FEATURES:

- Small, hand-held portable luminaire with integral hook for inspection and repair
- Size: 10.8in long by 2in wide
- Fiberglass-reinforced polyamide body
- Energy-saving and economical CFL lamp technology combined with electronic ballast provides high light output and long lamp life (10,000 hrs)
- Sealed against dust and debris (IP20)
- Rocker switch built into handle

PRODUCT INFORMATION

PAL-113

Voltage:	120V
Lamping:	1 x 13W CFL (5000K)
Luminaire Body:	Fiberglass-reinforced polyamide
Tube Material:	Acrylic
Protection Rating:	IP20
Cord Length:	10ft (3m)
Overall Length:	10.8in (274mm)
Diameter:	2in (51mm)

DESCRIPTION	PART #
